## Scientific Name and Overview

## Scientific Name/Botanical Name

The botanical name for Bergamot Bergaptene Free Organic Essential Oil is *Citrus bergamia*. This name has roots in its primary source—the bergamot orange—as well as its transformative journey to becoming this particular variant devoid of bergaptene.

## Oil Origin

Bergamot is native to the sunny regions of Southern Italy, with Reggio di Calabria being noted for its prime production. The oil is extracted from the rind of the fruit, a crossbreed of lemon and bitter orange that resembles a pear more than an orange.

## Extraction Process

The extraction of Bergamot essential oil involves cold pressing. This mechanical process preserves the integrity of the oil, maintaining its therapeutic properties and enhancing its aromatic profile. The removal of bergaptene, a phototoxic compound, ensures the oil is safe for use even in sun-exposed conditions.

## Characteristics of Bergamot Bergaptene Free Essential Oil

### Odor

Characterized by its uplifting and invigorating citrus aroma imbued with floral subtleties, Bergamot Bergaptene Free stands out for its complex yet delicate bouquet. This oil is widely appreciated for its ability to evoke a sense of freshness and joy.

### Consistency

Bergamot Bergaptene Free possesses a light, fluid texture, which makes it ideal for blending with other oils or for use in diffuser and topical applications. The texture facilitates easy absorption when applied to the skin.

### Country of Origin

Primarily sourced from Italy, this country's rich soil and favorable climate contribute to the distinct and high-quality essence extracted from the bergamot fruit. Selective sourcing ensures the finest quality in each bottle of oil.

### Evaporation Rate

Being a top note, Bergamot Bergaptene Free evaporates fairly quickly compared to base-note oils. This rapid evaporation is part of what lends its initial burst of aroma, ideal for diffusion and fragrance enhancement in various environments.

## Aroma and Constituents

The aroma of Bergamot Bergaptene Free is often described as a harmonious blend of citrus

with floral nuances. Its fragrance is both soothing and energizing, capable of evoking positivity and a sense of well-being.

## **Constituents**

The chemical composition of this essential oil showcases the absence of phototoxic bergaptene. However, it is rich in monoterpenes such as limonene, linalyl acetate, and linalool, which are credited for its calming and antiseptic properties.

## Blending and Uses

### Blends Well With

Bergamot Bergaptene Free blends harmoniously with a variety of other essential oils. Some of these include:

- Lavender
- Jasmine
- Geranium

- Ylang Ylang
