Celery Organic CO2 Oil

Product Details

Celery Organic CO2 Oil is distilled from the seeds of the celery plant, scientifically known as Apium graveolens, which is part of the Apiaceae family. This essential oil is meticulously extracted using the CO2 extraction method, a process that ensures high purity and potency by maintaining the integrity of the plant's constituent compounds. Available in various sizes, it caters to both personal use and wholesale demands, offering the finest quality of celery

Origin

The oil owes its genesis to the verdant fields of India, where celery seeds, renowned for their aromatic and medicinal properties, are cultivated with care and precision. Indian agriculture, with its storied history and commitment to sustainability, provides an ideal environment for growing celery, thus guaranteeing an oil of unmatched purity and efficacy. The traditional knowledge of seed cultivation and harvesting imbues this oil with authenticity and a rich cultural legacy.

Overview

The coalescence of tradition and modernity defines Celery Organic CO2 Oil. Among essential oils, it boasts an exquisite aromatic profile and an array of therapeutic qualities. Revered in ancient Indian, Greek, Roman, and Chinese medicine, celery oil has been traditionally employed as a diuretic and a holistic remedy for colds, digestive disturbances, and arthritic conditions. This enduring heritage substantiates its continued use in contemporary holistic health practices.
