Artemisia pallens flowers plant

What is Davana Essential Oil?

Davana essential oil, extracted from the flowering tops of the *Artemisia pallens* plant, is a lesser-known yet intriguing oil in the world of aromatherapy. Native to India, this plant is celebrated for its sweet, fruity fragrance, similar to apricots mixed with hints of a warm, herbaceous note. The process of steam distillation is used to extract the oil, capturing its complex aroma that often varies depending on the individual's body chemistry when applied.

A Brief History of Davana

The use of Davana dates back to ancient times in India, where it has been an integral part of traditional medicine and religious practices. It is often offered to Lord Shiva, a prominent deity in Hindu culture, reflecting its divine and spiritual significance. The herb is also used in Ayurvedic practices, highlighting its balancing and calming properties.

Chemical Composition of Davana Essential Oil

To understand the benefits of any essential oil, it's helpful to look at its chemical composition. Davana essential oil contains a complex array of components, with the most notable being Davanone, Linalool, Geraniol, and Bicyclogermacrene.
