Oil Origin and Extraction

German Chamomile Essential Oil is obtained from the flowers of the plant. The extraction process typically involves steam distillation, a method that preserves the delicate constituents of the oil. This brings us to the transformation of humble chamomile blossoms into a beautifully blue-hued liquid that we recognize as the essential oil.

Characteristics and Aroma

The enchanting aroma of German Chamomile Essential Oil presents a sweet, herbaceous, and slightly fruity scent. This pleasant fragrance has made it a staple in perfumery and

aromatherapy. Its color, a vibrant blue, is due to the presence of chamazulene, a powerful compound with soothing properties. The oil possesses a medium consistency and is somewhat viscous.
