# Pet Urine Be Gone: DIY Floor Cleaner for Fresh and Safe Homes

As pet owners, we understand that accidents happen. Cleaning up after these accidents while keeping our homes smelling fresh and safe for our furry friends is a top priority. Discover how to make your own Pet Urine Be Gone spray, a natural and effective solution to tackle pet odors and keep your floors clean.

## Benefits of Pet Urine Be Gone Spray

This DIY floor cleaner is not only effective in eliminating pet odors but also gentle on surfaces and safe for your pets. Here's why you'll love it:

- **Neutralizes Odors:** Say goodbye to unpleasant pet urine smells with this powerful blend.
- **Sanitizes and Cleans:** Keeps your floors spotless without harsh chemicals.
- **Pet-Friendly:** Crafted with natural ingredients that are safe for your pets.

## Shopping List

For one full 16.9-ounce bottle, gather these ingredients:

- **White Vinegar:** 1 cup
- **Distilled Water:** 1 cup
- **Baking Soda:** 1 tablespoon
- **Hydrogen Peroxide (3% solution):** 1/2 cup
- **Lemon Essential Oil:** 10 drops
- **Tea Tree Essential Oil:** 5 drops
- **Empty Spray Bottle:** One 16.9-ounce glass or BPA-free plastic bottle

## Tools and Equipment Needed

- **Mixing Bowl:** Small to medium-sized
- **Measuring Cups and Spoons:** For precise measurement of ingredients
- **Funnel:** To pour the mixture into the spray bottle without spills

## Step-by-Step Instructions

### 1. Prepare Your Ingredients

Ensure your workspace is clean and organized. Gather all the ingredients and tools you need.

See also [Sleep Blend for Waterless Diffusers](#)

### 2. Mix Vinegar and Water

In a small mixing bowl, pour 1 cup of white vinegar. Add 1 cup of distilled water and stir gently.

### 3. Add Baking Soda

Measure 1 tablespoon of baking soda and add it slowly to the vinegar-water mixture. Be prepared for fizzing—this is a normal reaction!

### 4. Incorporate Hydrogen Peroxide

Carefully measure 1/2 cup of hydrogen peroxide and add it to the mixture. Stir slowly to combine.

## 5. Add Essential Oils

Add 10 drops of lemon essential oil and 5 drops of tea tree essential oil into the mixture. Mix thoroughly to ensure even distribution.

## 6. Transfer to Spray Bottle

Using a funnel, carefully pour the mix into your 16.9-ounce spray bottle. Ensure the cap is secure.

## 7. Label and Store

Label your bottle with “Pet Urine Be Gone” using a marker or label maker. Store in a cool, dry place away from direct sunlight.

## Using Your Pet Urine Be Gone Spray

- **Shake Well:** Before each use, shake the bottle to mix the ingredients.
- **Application:** Spray directly onto the affected area and wipe clean with a mop or cloth.
- **Patch Test:** Test a small area first to ensure floor compatibility.

## Tips and Tricks

- **Alternative Scents:** Customize the scent by experimenting with other pet-safe essential oils.
- **Storage:** Keep out of reach of children and pets to ensure safety.

## Pros and Cons

### Pros:

- Safe for pets
- Environmentally friendly
- Cost-effective
- Easy to make

### Cons:

- Requires preparation time
- Needs proper storage

## Conclusion

Creating a Pet Urine Be Gone spray is a simple and effective way to keep your home smelling fresh and clean, all while ensuring the safety of your beloved pets. This natural cleaner is a must-have for any pet owner looking to maintain a hygienic and harmonious living space.

## FAQs

### **1. Can this cleaner be used on all floor types?**

Yes, but it's essential to do a patch test in a small area first to ensure compatibility.

See also [DIY All-Natural Mouthwash](#)

### **2. Are there alternative essential oils I can use?**

Yes, feel free to use any pet-safe essential oils like cedarwood or eucalyptus.

### **3. How should I store this cleaner?**

Store in a cool, dry place, away from direct sunlight to maintain its effectiveness.

### **4. What if my pet ingests the cleaner?**

Although non-toxic, it's best to consult a vet if a large quantity is ingested.

### **5. Can I use regular water instead of distilled water?**

Distilled water is recommended to avoid potential mineral deposits.
