Scientific Name/Botanical Name

The scientific name for the plant that yields Rosemary Camphor Borneol Organic Essential Oil is *Rosmarinus officinalis*. This plant, renowned for its aromatic leaves, is the foundation

of this powerful essential oil.

Oil Origin

Rosemary Camphor Borneol Organic Essential Oil is derived from the rosemary plant, which is native to the Mediterranean region. This plant thrives in the sunny and well-drained coastal areas around the Mediterranean Sea, making it a staple in both culinary and medicinal practices in these regions.

Extraction

The essential oil is typically extracted through steam distillation of the rosemary leaves. This method ensures that the volatile compounds, such as camphor and borneol, are carefully preserved, retaining their therapeutic properties. Steam distillation is a preferred method due to its efficiency in capturing the essence of the plant without compromising the integrity of its constituents.

Characteristics

Rosemary Camphor Borneol Essential Oil is characterized by its clear to pale yellow color. The oil is relatively thin in consistency, making it easy to blend with other oils and

ingredients. Its light texture facilitates absorption when applied in various remedies.

Odor

The aroma of this essential oil is camphoraceous and fresh, with a hint of woody fragrance. It offers a reviving scent profile that not only invigorates the senses but also purifies the air when used in diffusers.

Consistency

The oil has a thin consistency, which is typical of most essential oils. This allows for smooth application in various uses, from massage oil blends to aromatherapy.

Country of Origin

While rosemary plants are cultivated globally, the finest Rosemary Camphor Borneol Essential Oil is traditionally sourced from the Mediterranean countries, such as Spain, Italy, and Tunisia. These regions provide the ideal climate and soil conditions for the rosemary plant to thrive.

Evaporation

The oil has a medium rate of evaporation, positioning it as a moderate top-to-middle note. This feature makes it a versatile component in perfumery, combining well with a range of other top or base notes.
