The source of this Sage Essential Oil is the *Salvia officinalis* plant, a native of the Mediterranean. This geographical origin echoes a long history of herbal wisdom, infusing each drop with ancient insights. The steam distillation process used to extract the oil is not merely a method; it's a delicate art that captures the plant's essence without losing its integrity. The end result is a warm, spicy aroma that carries a hint of peppermint mixed with whispers of pine. This scent has a way of grounding me, conjuring an atmosphere that is both refreshing and meditative—a sensory journey to nature itself.
