Understanding Sage French Organic Essential Oil

Scientific Name/Botanical Name: *Salvia officinalis*

The scientific moniker of Sage French Organic Essential Oil is *Salvia officinalis*. Each name in this term is steeped in history, guiding both the curious and the learned into an appreciation for this entrancing plant. Its nomenclature signals its place within the *Salvia* genus, reminding us of the extensive botanical lineage it shares with other herbaceous plants used for medicinal and flavor-enhancing purposes.

Origin of the Oil

The oil finds its origins in the heart of Provence, France, a region renowned for its rich soil and ideal climate for growing aromatic herbs. These conditions yield sage of exceptional potency and fragrance.

Extraction Methodology

Sage French Organic Essential Oil is typically derived through the method of steam distillation. This process involves passing steam through the plant material which causes the release of essential oils, subsequently condensed into liquid form. Steam distillation is favored for its ability to preserve the essential oil's integrity and full spectrum of aromatic compounds.
