Savory Essential Oil

Savory Essential Oil, also known as Mountain Savory or Winter Savory, is distilled from the blossoms and plant parts of *Satureja montana*, a herbaceous plant native to regions of Europe and North Africa. Renowned for its potent antibacterial, anti-fungal, and antioxidant qualities, this oil not only stimulates the immune system but is also effective in addressing ailments like arthritis. However, given its strength and potential for irritation, it's imperative to use it with care, diluting appropriately to avoid any dermal reactions.
