Scientific Name/Botanical Name

Thymus vulgaris is the botanical name of the plant from which Thyme Borneol Organic Essential Oil is derived. The *Thymus* genus is part of the Lamiaceae family, known for its aromatic presence.

Oil Origin

The origin of this incredible essential oil can be traced back to the sprawling Mediterranean regions. Historically, the thyme plant has thrived in limestone soils, absorbing the earth's natural nutrients and transforming them into aromatic oils.

Extraction

Thyme Borneol Essential Oil is typically extracted through steam distillation. This method allows for the preservation of the potent chemical profile of the thyme plant, ensuring the capture of all its therapeutic qualities. The distillation process provides a high concentration of borneol, a compound prized for its potential wellness benefits.

Characteristics

This essential oil is known for its pale yellow to light brown hue, reflecting its pure and unaltered nature. The light, watery consistency is indicative of its pure extraction and expansive aromatic profile.

Odor

The odor exudes a warm, herbaceous, and slightly camphoraceous scent. The aroma is penetrating and earthy, often described as invigorating and stimulating. Borneol itself contributes a woody, balsamic note that balances the powerful thyme fragrance.

Consistency

The essential oil has a light, almost watery consistency, making it adequate for blending with other oils without overpowering them. This consistency helps in the easy absorption into applied surfaces when used in aromatherapy or topical blends.

Country of Origin

The primary regions for the cultivation and production of this essential oil include Spain, France, and Italy. These countries offer ideal growing conditions — a temperate climate with warm summers and well-drained soil.

Evaporation

Thyme Borneol Essential Oil is characterized by its strong top evaporate notes. Due to its quick evaporation rate, the aroma is both immediate and engaging, and it's typically one of the first oils you will notice in any blend.

Blends Well With

Thyme Borneol Essential Oil marries well with a variety of other essential oils to create harmonious blends. Notably, it pairs well with:

- Lavender Essential Oil
- Bergamot Essential Oil
- Lemon Essential Oil
- Rosemary Essential Oil
- Eucalyptus Essential Oil

Aroma

The aroma of Thyme Borneol is not just for enjoyment; it plays an important role in its function. Often employed to invigorate and refresh mental states, its pungent and clear scent acts as a mental stimulator and motivator.

Constituents

Thyme Borneol Essential Oil contains vital chemical constituents that include borneol, thymol, and carvacrol. Borneol is renowned for its potential in supporting respiratory function and contributing to overall human wellness.

Blending and Uses

Blending thyme borneol oil opens endless aromatic possibilities. Paired with lavender, for instance, it creates a soothing ambiance while offering relief and aiding relaxation. Combining it with lemon oil unleashes a fresh, invigorating aroma perfect for revitalizing any space.

Safety

Safety is paramount when dealing with potent essential oils. Ensure you dilute Thyme Borneol Essential Oil to a suitable concentration before topical application. Patch testing is always recommended. Pregnant women and children should use this oil under professional guideline to ensure safety and efficacy.
