## Discovering Wintergreen Essential Oil from Barefut

Wintergreen Essential Oil, brought to us by Barefut Essential Oils, is a celebration of nature's vigor and fragrance, with a scent that's delightfully minty and refreshingly robust. Known botanically as *Gaultheria procumbens*, this essential oil is carefully crafted from the steam-distilled leaves of the Wintergreen herb, which thrives in the rich, verdant landscapes of Asia and North India. As you open the cap and let the aroma unfurl into the room, you'll find it hard not to be transported to these lush, distant lands.

### The Origin and Extraction

Wintergreen Essential Oil takes its roots in China, where the *Gaultheria procumbens* plant is nurtured by the elements and harvested at its peak. The extraction process focuses on steam distillation, a method that preserves the plant's integrity and purifies the oil extracted from the leaves. The result is a pristine, untouched essential oil that retains the powerful essence of Wintergreen.
