Ylang Ylang 3 Superior Organic Essential Oil

Product Overview

Ylang Ylang 3 Superior Organic Essential Oil is an exquisite oil extracted from the delicate

golden flowers of the Ylang Ylang tree. This tree, initially native to the Philippines, flourishes in tropical regions like Madagascar. The oil is derived through steam distillation of these flower blossoms, a meticulous process that captures its rich and alluring properties. Known for its soothing, relaxing, and aphrodisiac qualities, this essential oil is a treasure in aromatherapy.

Source and Extraction

The Ylang Ylang tree, scientifically known as *Cananga odorata*, yields blossoms that are both beautiful and fragrant. Indigenous to Southeast Asia, this tree now grows in many tropical locales where conditions favor its development. The extraction of the oil begins with handpicking the flowers at dawn when their fragrance is most potent. Steam distillation follows, a technique that draws out the essence without compromising its integrity. The result is a superior quality essential oil categorized as the third fraction in the distillation process, known as Ylang Ylang 3.

Traditional Uses

Ylang Ylang has a rich history, with its use tracing back to traditional Indonesian wedding rituals where its petals are scattered over the marriage bed. This practice underscores its reputation as an aphrodisiac. Furthermore, during the Victorian era, Ylang Ylang was popularized as a treatment for hair health, touting benefits like enhancing luster and strength. Beyond its romantic allure, Ylang Ylang has been intuitively used in traditional medicine to ward off fevers and combat infectious ailments.
